DATE: January 5, 2021

TO: City of Gregory customers

The combined capacity at Lake Corpus Christi and Choke Canyon Reservoir has fallen below 40%. In accordance with the City's 2018 Drought Contingency Plan (DCP), the following **Stage**

1 – Mild Water Shortage Watch conservation actions are effective immediately:

- Residents can use their irrigation system **once a week**, on resident's trash collection day, before 10 a.m. and after 6 p.m. Monday or Thursday
- Hand watering is allowed on any day using a shut off nozzle.
- Foundations can be watered once a week with a hose or drip irrigation.
- During Stage 1, commercial car washes and landscape nurseries are not impacted.

The City encourages residents to follow these water-wise conservation measures:

- Avoid water run-off on streets and sidewalks
- Check for water leaks around your home
- Wash full loads in your laundry and dishwasher

Thank you for your cooperation.

City Administration and staff
