

A WORLD-CLASS PLASTICS MANUFACTURING FACILITY
Proposed by ExxonMobil and SABIC

CONSTRUCTION ALERT

Dear Neighbors,

Consistent with our project construction plan, GCGV will require temporary road closures across Highway 181 and Farm-to-Market 2986. This temporary closure is planned for early Saturday morning between midnight and 5 a.m. Road preparations and traffic management plans, led by Texas Department of Transportation and local authorities, will begin just before midnight Friday.

For detour information, see [this fact sheet](#).

Traffic alerts will be posted on affected roadways in advance of road closures. We also will use our Facebook page (@GulfCoastGV) to keep our community updated.

Sincerely,
The GCGV Project Team

MODULAR MOVES

GCGV's dock and dedicated heavy haul road will facilitate the transport of equipment and modules to the project site and reduce traffic on local roads during project construction. GCGV has completed construction of the nearly 5-mile heavy haul road in preparation for transportation of modules to the project site, which will begin in November 2019 and continue intermittently through mid-2021.

Self-propelled transporters designed for heavy loads will carry the modules slowly and safely across Highway 181 and Farm-to-Market 2986. Once at the main project site, construction crews will use the modules and equipment to build a world-class petrochemicals complex.

Modules will be transported from the dock to the site via a dedicated heavy haul road to minimize impact on traffic.

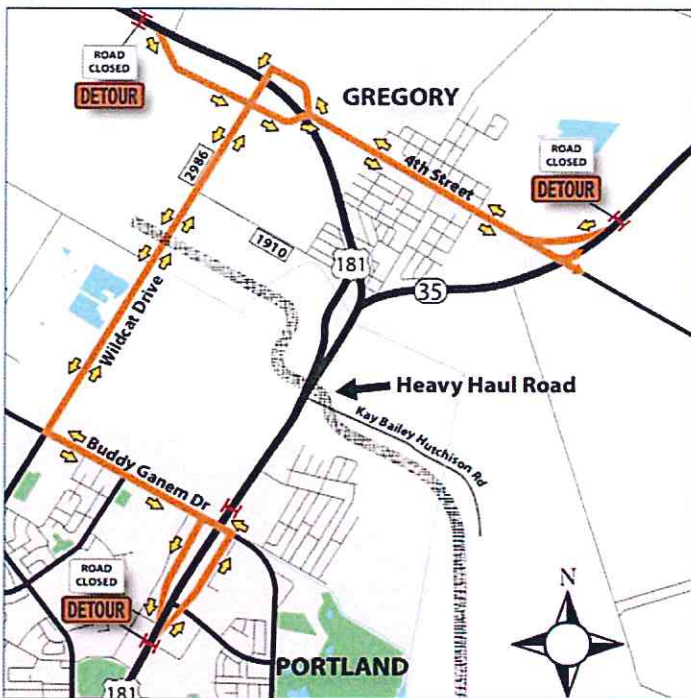

Modules will arrive by ship to the GCGV dock on the La Quinta Channel.

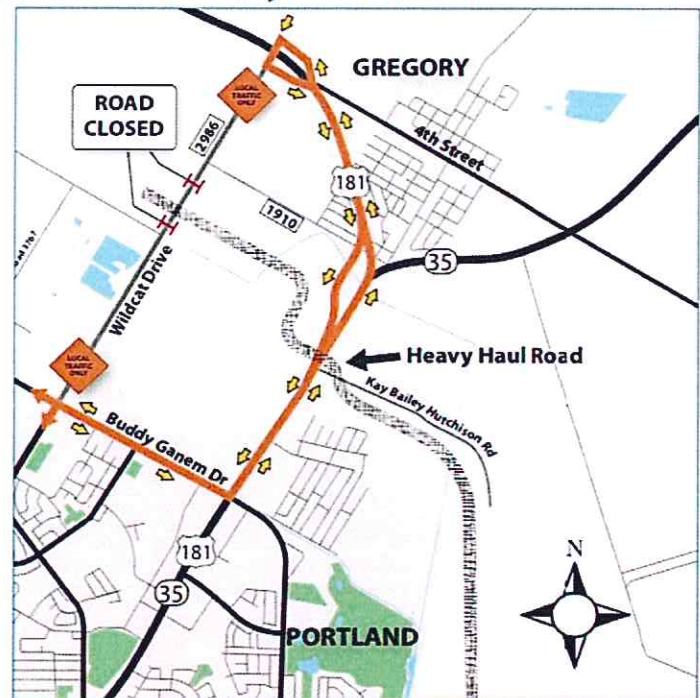

Modularization increases construction efficiency and reduces impact on local infrastructure.

Safe transportation of these modules will require temporary road closures across Highway 181 and FM 2986. Traffic management plans are in place and coordinated by Texas Department of Transportation with support from local agencies. GCGV has scheduled these temporary closures to avoid peak travel times and school bus routes.

GCGV, in coordination with TxDOT, will communicate in advance of any road closures.

Detour route for Highway 181 crossing. Road closures and detours will occur between midnight and 5a.m.

Detour route for FM 2986 crossing. Road closures and detours will occur at non-peak times.

continued

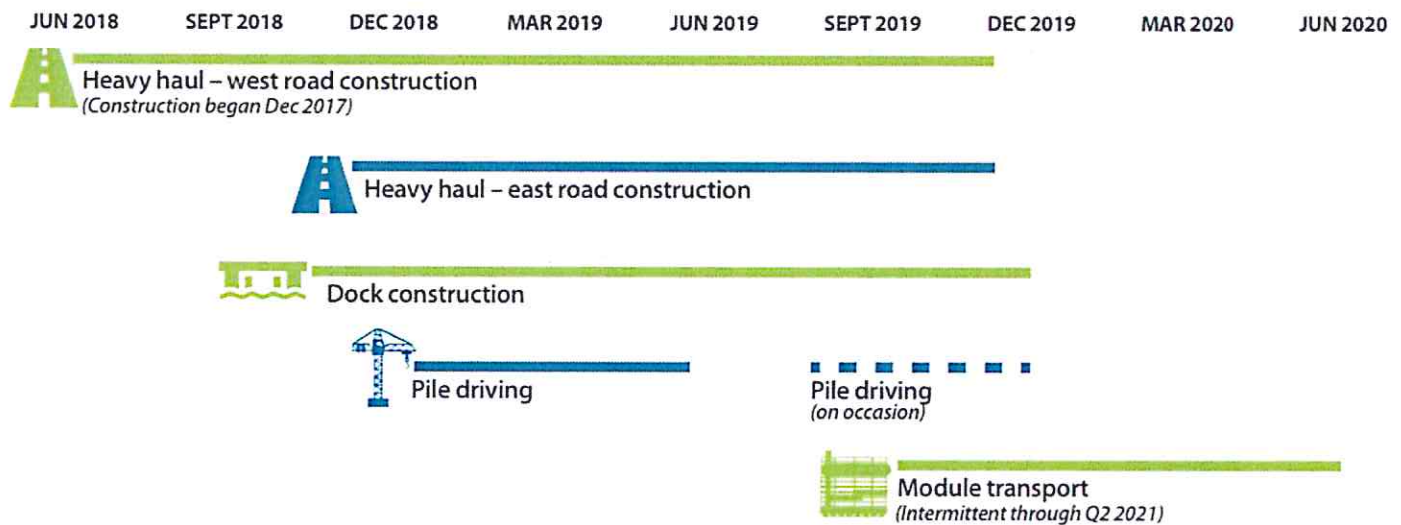

MODULAR MOVES

COMMITTED TO MINIMIZING LOCAL IMPACTS

Throughout construction of the dock and heavy haul road, GCGV has taken steps to minimize impacts to our neighbors and the local community, including:

- Scheduling heavy haul transports to avoid peak travel times
- Building the heavy haul road to reduce traffic on local roads during project construction
- Transporting aggregate on a dedicated construction road to minimize impacts to public roads throughout heavy haul road construction
- Reducing the number of piles needed to safely build the dock
- Investing in pile driving equipment that reduces noise
- Limiting pile driving times to daylight hours

TIMELINE

Updated November 2019

We're listening ... and we're committed to keeping you informed.

We recognize this activity will impact the community, and we are committed to minimizing these impacts as much as possible. Please stay tuned to our Facebook page @GulfCoastGV or contact us with any questions or concerns at 844.280.1993 or info@gulfcoastgv.com.
